

11/3/66

Dear Miss Brunson,

Forgive my haste, but things are busier, as you without doubt know, and I was busy enough before.

Your Walker stuff is very interesting and credible. I never had the time to go into it thoroughly, but I hope you will have the time, even if I do not answer, to keep me posted on your thoughts and conclusions.

One other thing about that letter you should bear in mind: It was found belatedly, after a period of time when there was access to the Paine home. It is something that did not show up in those really comprehensive seizures.

I do not think there was another Lee Oswald but there was without doubt, as you will soon I hope see another False Oswald.

I am still inclined to think Oswald was what he said that the Commission could not bear to include in the Report, a "patsy".

Yesterday's developments do not seem to yield more available materials for research. They seem rather to reveal the pressure the government feels and its willingness to attempt further diversions.

Sincerely,

Harold Weisberg
